

## Ideas

### ① Time Series Plot

### ② Stacked Area Chart

### ③ Heatmap

### ④ Stacked bar chart

### ⑤ Histogram

### ⑥ Piechart

### ⑦ Bar Chart

### ⑧ Bubble Chart

### ⑨ Scatter Plot

### ⑩ Choropleth map

## Filter

- Graph ② is filtered as it brings same information as ④ but harder to visualize
- Graph ⑥ is used to represent instead of ③ so the poverty rate can be visualize easier
- Graph ⑤ and ⑨ both some relationship between income and expenditure but ⑧ is more interactive

## Categorize

Median Income by State

Mean Expenditure

Poverty Rate by State

## Combine & Refine

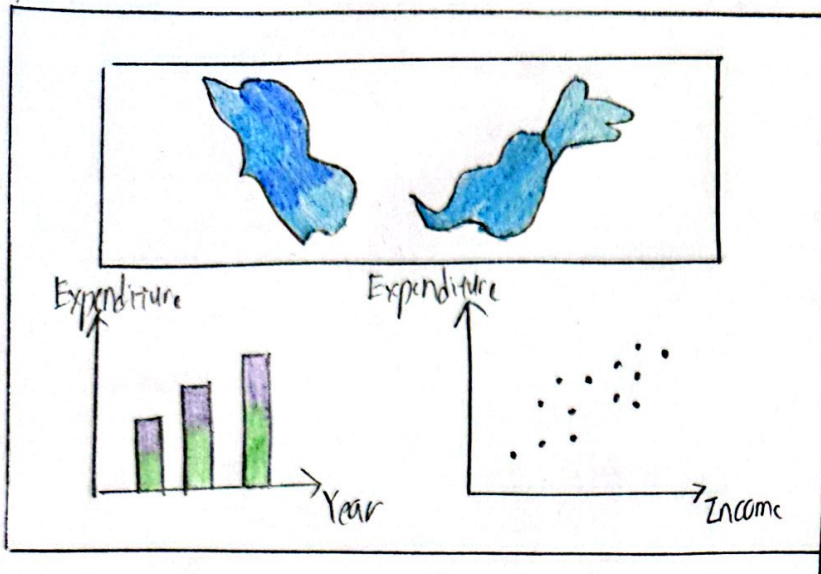

① + ④

- Explore income and expenditure at once

## Questions

- Are these idea implementable?
- Does these visualization provide sufficient information?
- Are they relevant to my topic?

## Focus

### - Choropleth Map

→ Shows the difference in median income between states

### - Scatter plot

→ Find the relationship between income and expenditure

Title: Household Income in Malaysia

Author: Mak Ying Zhang

Date: 14/10/2024

Sheet: 2

Task: Map, stacked bar chart and scatter plot

## Operations

### ① Choropleth Map

- Diverging colour shows the median income by each state

### ② Stacked bar chart

- colour represent state  
- area coverage shows the expenditure each state by year

### ③ Scatter plot

- shows the relationship between income and expenditure by each state

## Discussions

### Positives

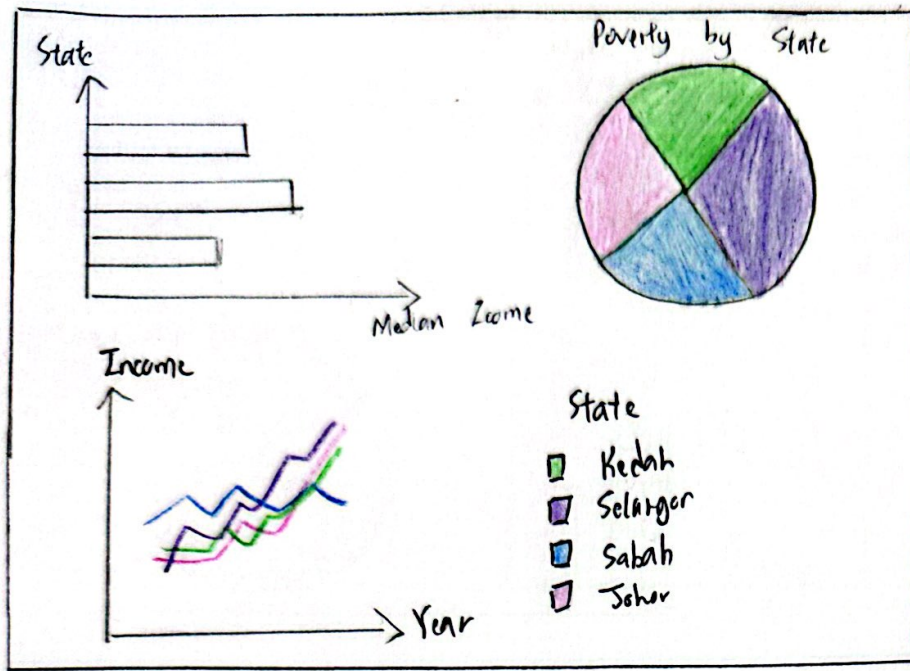

- 1) clear visualisation of changes in income and expenditure
- 2) Easy implementation

### Negatives

- 1) Less interactive

# Layout

Title : Household Income in Malaysia

Author : Mak Ying Zhong

Date : 14/10/2024

Sheet : 3

Task : Bar chart, pie chart and line graph

## Operations

### ① Bar chart

- show the different in income between state

### ② Pie chart

- colour represent state
- each portion represent poverty rate

### ③ Line graph

- colour represent state
- show changes in income

## Pros

### → Line Graph

- show the trend of change in income of each state over year

### → Pie chart

- percentage of each state poverty can be visualized clearly

## Discussion

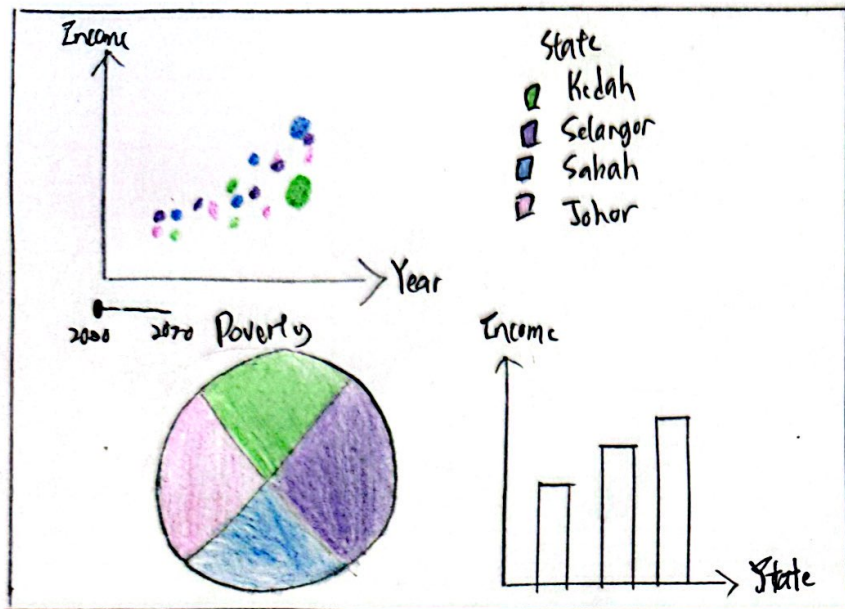

### Positives

- Clear visualization of change in income
- simple and clear

### Negatives

- Not interesting

# Layout

## Focus

→ Bubble plot

0 → 0 → 0

Larger bubble shows higher expenditure

- a slider filter is apply to filter year

Title : Household Income in Malaysia

Author : Mak Ying Zhang

Date : 14/10/2024

Sheet : 4

Task : Bubble plot, pie chart, bar chart

## Operations

① Bubble plot

- show relationship between income and expenditure

② Pie chart

- colour represent each state shows the poverty rate

③ Bar chart

- Show difference between state each year

## Discussion

### Positives

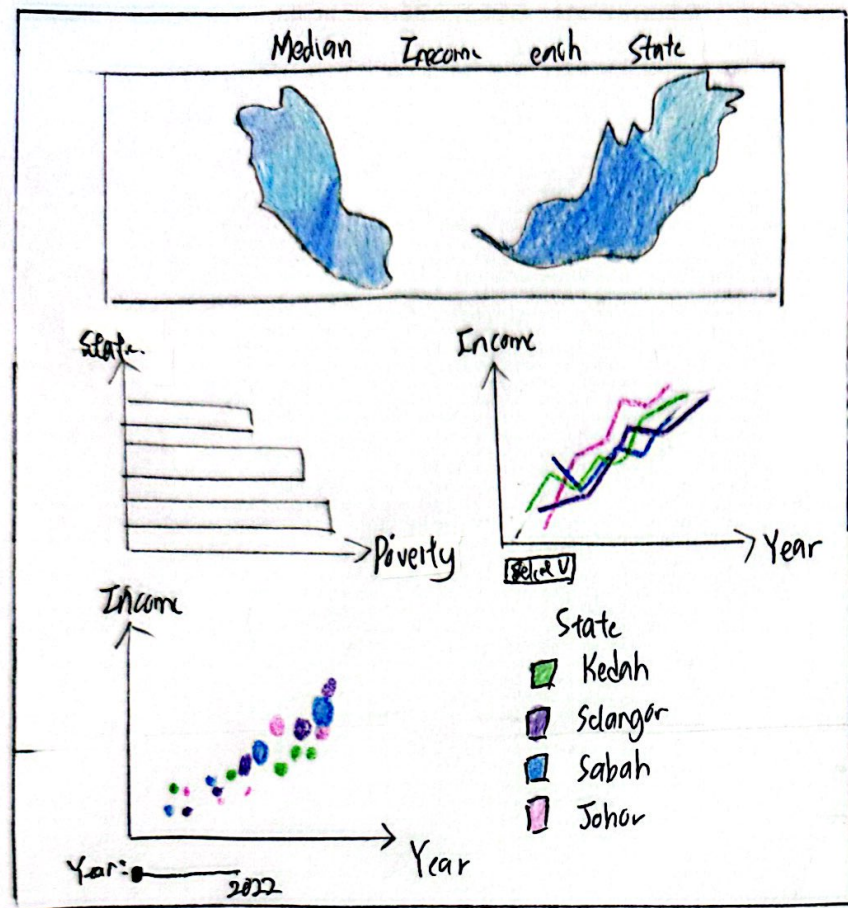

1) Interactive bubble plot between to visualize relation between income and expenditure

2) Easy implementation on pie chart and bar chart

### Negatives

- layout lack of story flow

Title:

Author: Mak Ying Zhang

Date: 14/10/2024

Sheet: 5

Task: Final layout

### Operations

- ① Choropleth Map created to show the median income of each state
- ② Bar chart shows comparison in between state
- ③ Line graph created to show the change in income
- ④ Bubble plot shows the relationship between income and expenditure

### Detail

- Clear legend must be shown to know state
- Annotate the maximum point in bubble plot and line graph
- Make comparison to show contrast between poverty and income

### Focus

- ① Choropleth Map
  - Show the different in income of each state
- ② Line graph
  - A select filter is applied
  - can see income trend by overall or selected state only
- ③ Bubble plot
  - each bubble with different colour represent its state
  - size increase with expenditure
  - Each bubble provides complex information
